NAJEEB ABDI

Doha, Qatar | najeebabdi75@gmail.com | (+974) 33047295 | Portfolio: najeeb-abdi.vercel.app | LinkedIn: Najeeb Abdi | GitHub: najeeb101

EDUCATION

B.S. in Computer Science *Expected May 2027*
Qatar University *Doha, Qatar*
Coursework: Data Structures & Algorithms, OOP, Software Engineering, Algorithm Design & Analysis, AI Fundamentals, Machine Learning.

EXPERIENCE

AI and Automation Intern *Oct 2025 – Present*
Silatha (Remote) *Amsterdam, Netherlands*
- Designed and deployed production AI automation pipelines using n8n, Python, and the OpenAI API, replacing manual workflows across multiple business functions and cutting recurring processing time.
- Integrated third-party APIs into data pipelines with monitoring, error handling, and performance dashboards, supporting weekly release cycles with consistent uptime and data reliability.

Industry Partnership Intern, Scale AI *Jun 2026 – Aug 2026*
Qatar University Industry Partnership Program *Doha, Qatar*
- Designed and built the Cohort Simulator, a discrete-event agent-based model of QU CS student progression, using Monte Carlo simulation to flag prerequisite courses and capacity constraints likely to delay graduation.
- Developed a web dashboard with a Scenario Builder and Plan Builder, letting the Head of the Department test curriculum and capacity changes before committing to them.

Research Intern, AI-Based Aquaponics System Development *Aug 2025 – Nov 2025*
Qatar University *Doha, Qatar*
- Led AI research on a federated aquaponics control system using reinforcement learning for distributed model optimization, and deployed an AI-enabled greenhouse prototype with ML-driven sensors and control hardware across institutions.

PROJECTS

CodeTutor *Sep 2026 – Present*
AI coding tutor & auto-grader platform for CS students *Doha, Qatar*
- Building a RAG-based coding tutor and auto-grader with an evaluation harness, plus an RL data pipeline (GRPO) that turns graded student attempts into training data.

Thermal Trace, Co-Founder & Lead Developer | Open Innovation Award, UN Reboot the Earth Hackathon *Sep 2026 – Present*
AI cold-chain intelligence platform for food security in Qatar/GCC *Doha, Qatar*
- Designed an AI platform that monitors perishable food across the cold chain (farm, transport, cold storage, retail), modeling each product's thermal state to predict remaining shelf life and spoilage risk before losses happen.
- Developed the shelf-life model, an Arrhenius deterioration model that turns a load's temperature history into its remaining safe life against product-specific temperature limits.

RouteyAI, Founder & Lead Developer *May 2025 – Present*
AI-powered school bus routing platform for the Qatar/GCC market *Doha, Qatar*
- Founded and built a route-optimization engine combining K-means clustering with nearest-neighbour and cheapest-insertion routing on Mapbox driving times to generate bus routes for school transport operators.
- Architected the full stack on Next.js and TypeScript with Supabase (PostGIS, Realtime, Edge Functions), and Mapbox GL JS, with real-time GPS tracking so dispatchers, drivers, and parents see live bus position and ETA on one map.

Taqriban, Solo Developer *Oct 2026 – Present*
Arabic-first daily estimation game, live at taqriban.vercel.app *Doha, Qatar*
- Built and shipped a mobile-first, right-to-left game (Next.js, Supabase) with leaderboards, private groups, and streaks; all data access goes through Postgres security-definer functions with RLS deny-all, so answers stay server-side until a guess is locked.

ADDITIONAL PROJECTS

Naja7 AI, AI-Driven Contract Analyzer (Team Member, Oct – Nov 2025): flags risk clauses in contracts using document parsing and QDB rules.

Other Projects: Lectura, AI lecture-to-notes platform (FastAPI, Next.js, faster-whisper); Silatha Word Search Game (React, Vite, Firebase; ~200 players); Freelance Design & Content (menu design, study guides).

ACTIVITIES & LEADERSHIP

Head of Events, Artificial Intelligence Organization *Apr 2025 – Present*
Qatar University *Doha, Qatar*
- Co-organize campus-wide AI events, including AI Week and the Innovation Program, coordinating logistics and demo setup.

Also: Events Member, Mechatronics Committee; Student Assistant, IT Student Task Force; Events & IT Support, Research Complex.

Participant and Ambassador, Shell Intilaaqah Entrepreneurship Program *Sep 2025 – Present*
Shell Qatar *Doha, Qatar*
- Developed and pitched an early-stage startup concept under mentor guidance, covering business modeling and pitching.

SKILLS

AI / ML: Machine Learning, Deep Learning (TensorFlow), RL (GRPO), Federated Learning, RAG, LLM Evals, Clustering & Routing Heuristics
AI Automation: OpenAI API, n8n, API Integration, Monitoring & Error Handling, Prototype Deployment
Web & Full-Stack: React.js, Next.js, TypeScript, Vite, FastAPI, REST APIs, Tailwind CSS, Web Scraping
Data & Infrastructure: Supabase (PostgreSQL, PostGIS, Realtime), Firebase, Redis, Docker, Mapbox GL JS, Data Pipelines
Languages & Tools: Python, JS/TS, SQL, Java, HTML/CSS, Git, VS Code, Postman | **Spoken:** English (Fluent), Arabic
