

NAJEEB A. ABDI

Doha, Qatar | najeebabdi75@gmail.com | (+974) 33047295 | LinkedIn: Najeeb Abdi | GitHub: najeeb101

EDUCATION

B.S. in Computer Science

Qatar University

Technical coursework: Data Structures & Algorithms, OOP, Software Engineering, Algorithm Design & Analysis, AI Fundamentals, Machine Learning.

Expected May 2027

Doha, Qatar

EXPERIENCE

AI and Automation Intern

Silatha (Remote)

Oct 2025 – Present

Amsterdam, Netherlands

- Designed and deployed production AI automation pipelines using n8n, Python, and the OpenAI API, replacing manual workflows across multiple business functions and cutting recurring processing time.
- Integrated third-party APIs into data pipelines with monitoring, error handling, and performance dashboards, supporting weekly release cycles with consistent uptime and data reliability.

Qatar University Internship

Qatar University Industry Partnership Program

Jun 2026 – Aug 2026

Doha, Qatar

- Completed an internship with Scale AI through Qatar University's industry partnership program, gaining hands-on experience with how a leading AI data and evaluation company runs production ML workflows.
- Designed and built the Cohort Simulator, a discrete-event agent-based model of QU CS student progression, using Monte Carlo simulation to flag prerequisite courses and capacity constraints likely to delay graduation.
- Developed a web dashboard with a Scenario Builder and Plan Builder, letting Head of the Department test curriculum and capacity changes and see projected effects on student flow before committing to them.

Research Intern, AI-Based Aquaponics System Development

Qatar University

Aug 2025 – Nov 2025

Doha, Qatar

- Led AI research on a federated aquaponics control system using reinforcement learning for distributed model optimization and deployed an AI-enabled greenhouse prototype with ML-driven sensor and control hardware in a multi-institution collaboration.

PROJECTS

Thermal Trace, Co-Founder & Lead Developer | Open Innovation Award, UN Reboot the Earth Hackathon

AI cold-chain intelligence platform for food security in Qatar/GCC | Doha, Qatar

Sep 2026 – Present

- Designed an AI platform that monitors perishable food across the cold chain (farm, transport, cold storage, retail), modeling each product's thermal state to predict remaining shelf life and spoilage risk before losses happen.
- Developed the "Thermal Reserve" model, which calculates per-item shelf life from zone-level sensor readings using produce-specific temperature limits, so mixed loads in one truck are judged item by item instead of against one average.

RouteyAI, Founder & Lead Developer

AI-powered school bus routing platform for the Qatar/GCC market

May 2025 – Present

Doha, Qatar

- Founded and built an AI route-optimization engine combining K-Means++ clustering with TSP heuristics to generate efficient, constraint-aware bus routes for school transport operators.
- Architected the full stack on Next.js and TypeScript with a FastAPI optimization service, Supabase (PostGIS + Realtime) for geospatial data and live sync, and Mapbox GL JS for live route and vehicle visualization.
- Built real-time GPS broadcast and tracking so dispatchers, drivers, and parents see live bus position and ETA on the same map.

ADDITIONAL PROJECTS

AI-Driven Contract Analyzer

Team Member

Oct 2025 – Nov 2025

Doha, Qatar

- Built an AI workflow for contract lifecycle automation: a text-processing pipeline that extracts key terms and flags risk clauses, deployed as a rapid prototype combining document parsing with QDB business rules for review decisions.

Other Projects: Silatha Word Search Game (React, Vite, Firebase); Social Media Platform (Next.js, Prisma); Library Loan Software (team lead); Freelance Design & Content (menu design, study guides).

ACTIVITIES & LEADERSHIP

Head of Events, Artificial Intelligence Organization

Qatar University

Apr 2025 – Present

Doha, Qatar

- Co-organize campus-wide AI events, including AI Week and the Innovation Program, coordinating logistics and technical demo setup.

Also: Events Member, Mechatronics Committee; Student Assistant, IT Student Task Force (QU ITS); Events & IT Support, Research Complex.

Participant and Ambassador, Shell Intilaaqah Entrepreneurship Program

Shell Qatar

Sep 2025 – Present

Doha, Qatar

- Developed and pitched an early-stage startup concept under mentor guidance, covering business modeling and pitching.

SKILLS

AI / ML: Machine Learning, Deep Learning (TensorFlow), Reinforcement Learning, Federated Learning, Model Optimization, Optimization Heuristics (K-Means++, TSP)

AI Automation: OpenAI API, n8n, API Integration, Monitoring & Error Handling, Prototype Deployment

Web & Full-Stack: React.js, Next.js, Vite, REST APIs, FastAPI, Web Scraping

Data & Geospatial: Supabase (PostgreSQL, PostGIS, Realtime), Firebase, Mapbox GL JS, Data Pipelines

Languages & Tools: Python, JS/TS, SQL, Java, HTML/CSS, Git, VS Code, Postman | Spoken: English (Fluent), Arabic
